

# MLS Therapy

– the Alternative Pain Management Solution to Surgery and Painkillers

Since its inception 5 years ago, MLS Laser Therapy is quickly becoming the standard of care in alleviating both acute and chronic pain. This patented, FDA-cleared technology has an **85% - 90% efficacy rate** in relieving pain and inflammation, **eliminates risk from surgery and prescription pain killers**, has no **negative side effects**, and **restores patients' lives**.

At Cascadia Chiropractic Centre, we have helped hundreds of patients get out of pain and increase their range of motion. Laser therapy has been used effectively for many years, but advances in technology have produced "the next generation of laser therapy" with the MLS (Multi-wave Locked System) Laser Therapy which uses specific wavelengths of light to treat painful and debilitating conditions. With laser therapy, Dr. Simpson Leung can offer relief to those suffering with both chronic and acute ailments such as back and joint pain, sciatica, tendinitis, arthritis, disc disease, and sprains and strains without the use of painful injections or potentially habit forming drugs.

Laser therapy is painless, with treatments usually lasting several minutes, and most patients see

positive results in just 1-3 treatments. "When a physical condition or injury affects mobility or quality of life, there is one goal: a rapid return to every day activities. We have the most advanced equipment on the market to deliver these results; results that include a very rapid reduction in pain, strong anti-inflammatory effect, and immediate improvement of local blood circulation," states Dr. Leung. "More and more, our patients are looking for effective treatment options that are less invasive, have no side effects, provide rapid results and speed the healing process. Laser therapy provides us with an opportunity to meet the needs of our patients, and offer the highest levels of care possible."

Dr. Leung summarizes, "We pride ourselves on staying on the leading edge of technology, and educating our patients on the various levels of care available. Laser therapy is becoming the standard of the chiropractic/podiatric/pain management industry, and we feel our patients deserve to have that option when choosing the best care for themselves."
